SOFTWARE & PROCESS CONTROL

AEGIS Software is a global leader in manufacturing execution systems (MES), including FactoryLogix, enabling real-time visibility, control, and optimization across manufacturing operations.

ECD pioneers in advanced thermal profiling systems used to monitor and optimize reflow and other thermal processes in manufacturing.

INSPECTION & TEST

Comet Yxlon is a global leader in advanced X-ray and CT inspection systems for non-destructive testing in electronics and industrial applications.

Aven Tools provides advanced digital microscopes, optical inspection systems, and precision hand tools that help manufacturers improve defect detection, reduce operator fatigue, and perform detailed inspection and assembly work.

ASC International provides advanced AOI, SPI, and metrology systems to optimize process control, product quality, and manufacturing yield.

Seica builds on four decades of test innovation to develop advanced automated test solutions that improve product quality, process verification, and manufacturing reliability.

ViTrox delivers advanced AXI/X-Ray, AOI, SPI, factory automation, and smart manufacturing solutions designed to improve quality, yield, and production efficiency.

Z TECH SERVICES

Delivering Electronics Manufacturing Solutions Since 1993

We exist to make you successful.

Scan to explore solutions tailored to your manufacturing process

Now featuring ZTech Bits — Precision carbide router bits.

SMT & PRODUCTION EQUIPMENT

Universal Instruments builds on decades of automation leadership to deliver advanced placement and automation solutions that improve flexibility, throughput, and production performance.

Hover-Davis provides intelligent component feeding solutions compatible with leading SMT platforms, improving efficiency and flexibility across production lines.

BTU International is a global leader in thermal processing equipment for SMT assembly, semiconductor manufacturing, and alternative energy applications.

Metcal (OK International) pairs industry-leading SmartHeat® technology with a long tradition of soldering excellence to help manufacturers achieve precise, repeatable assembly and rework results.

TOOLING, FIXTURES & SUPPORT

AGI (Agicorp) and **AGI Stencils** deliver precision tooling, fixtures, and SMT stencil solutions that improve process reliability, product quality, and production efficiency.

Eubanks Engineering builds on a heritage of wire processing expertise to develop solutions that improve precision, consistency, and productivity in cable and harness manufacturing.

ZTech provides on-site demos, training, service, and parts support.

CableScan builds on more than 50 years of wire harness testing expertise to develop automated verification solutions that improve product quality and performance.

Sumake sets the standard for durable pneumatic tools and assembly equipment designed for efficiency, precision, and operator comfort.

STEINEL builds on decades of hot air technology expertise to design premium heat guns and thermal tools that deliver precision, durability, and reliable performance.

SmartDRY helps manufacturers protect moisture-sensitive components and maintain product integrity through intelligent dry storage solutions.

FKN SYSTEK provides PCB depaneling systems, wire crimp tooling, and PCB handling and storage solutions that support efficient, reliable electronics manufacturing.

Botron protects product quality with advanced ESD control solutions, including monitoring, testing, and ionization systems for safer, more reliable manufacturing.

AMTI develops automated wire, cable, tubing, and hose processing solutions that improve process consistency, product quality, and production efficiency.

WirePro Tech designs precision mechanical and pneumatic fixture clamping solutions that improve reliability, repeatability, and performance in automated test environments.

Lindström is the world leader in precision hand tools engineered for high-performance applications including electronics assembly, aerospace, and medical manufacturing.

Bimos designs ergonomic seating solutions engineered to support operator comfort, safety, and productivity in industrial and ESD environments.

MATERIALS, CLEANING & COATING

Nordson ASYMTEK delivers precision dispensing, jetting, and conformal coating systems for electronics assembly and advanced manufacturing.

DCT develops complete electronics cleaning solutions that improve process reliability, product quality, and manufacturing efficiency.

EVS International provides solder recovery solutions that help manufacturers reduce waste, lower material costs, and support more sustainable electronics manufacturing.
